## Education

### BACHELOR OF SCIENCE

MAHATMA GANDHI KASHI VIDYAPEETH UNIVERSITY, VARANASI,  
UTTAR PRADESH

2021 - 2024

COMPUTER SCIENCE

### SENIOR SCHOOL (12th)

MAHATMA J.F. PUBLIC SCHOOL

Passed : 2020

- CBSE

### HIGH SCHOOL (10th)

SETH M.R. JAIPURIA SCHOOL

Passed : 2018

- CBSE

## Experience

### Fresher Web Developer | Personal & Academic Projects

- Developed multiple **real-world** projects showcasing problem-solving, **DSA**, and **full-stack** web development.
- Built **scalable** and optimized applications following **best coding practices**.
- Actively **contributed** to **open-source** projects and collaborated with peers on **GitHub**.

## Coursework

- Completed **Full Stack Web Development** Bootcamp from Udemy .
- Completed **AI for Beginners** Course from HpLife
- **Data Science and Analytics** from HpLife.

## Hobbies and Interests

- Cricket
- Video Editing
- Anime

## Skills and Abilities

### PROGRAMMING

C/C++ Python JavaScript

### FRONT END

HTML CSS ReactJs

### BACK END AND DATA TOOLS

Node.Js Express.Js Postgres SQL

### OTHER SKILLS

EJs BootStrap API SUPABASE

## Projects

### [Blog-App](#)

- This blog platform allows users to create, edit, and **auto-save** blog posts with **secure** login via **Supabase Auth**.
- Built using **React**, **Node.js**, **Express**, and **Axios**, it connects to a Supabase **Postgres database** for smooth **CRUD operations**.
- The platform features an **auto-save draft system**, ensuring your content is never lost — making **writing effortless** and **reliable**.

### [PERSONAL-NOTES](#)

- This notes app lets users securely **sign in with Google** and manage their notes through a **clean EJS-based interface**.
- User data and notes are stored in a **Supabase Postgres** database, with passwords **hashed using bcrypt** for extra security where needed.
- Built with **Node.js**, **Express**, and **EJS**, the app supports full **CRUD** operations, offering a fast and intuitive way to organize your thoughts.

### [GOOGLE KEEP CLONE WITH REACT](#)

- A fully **responsive Google Keep clone** built entirely with **React**, offering an **intuitive UI** for creating, editing, pinning, and deleting notes.
- This app lets users create, edit, pin, delete, and **color-label notes**, all stored locally using **localStorage**.
- With features like **color-coded notes**, real-time updates, and a minimalist design, it brings the core Keep experience to your browser.

## Practice Projects

- [Myntra Clone](#)
- [Permalist App](#)
- [Weather App](#)
- [FAMILY TRAVEL TRACKER](#)
- [CRYPTO PRICE TRACKER](#)
