Ejs BootStrap API

Projects

[Real-Time Crypto & FX Tracker](#)

March 2025 – April 2025

- **Crypto & FX Tracker** Automation helps you track **real-time** cryptocurrency and forex rates using public **APIs**.
- Built with **Express**, **Axios**, and **Node.js**, this project automates data fetching and display.
- This project saves time by providing a simple interface to monitor multiple currencies in one place.

[FAMILY TRAVEL TRACKER](#)

April 2025 – April 2025

- Developed using **Node.js**, **Express**, **EJS**, and **PostgreSQL** to track and store visited countries by each user.
- User can **add** a **country** by typing its **name**, which then **highlights on the map** in their chosen color.
- Travel history is saved in PostgreSQL and displayed through a **responsive, clean UI** for a smooth experience

[RATE IT NOW APP](#)

April 2025 – April 2025

- Powerful **API** for seamless book note management, enabling users to effortlessly **add** and **delete** notes in real-time.
- Crafted with **Node.js**, **Express**, **Axios** and **EJS**, delivering a sleek, user-friendly interface for **effortless interaction**.
- Robust **PostgreSQL** database ensures ultra-secure, lightning-fast data storage, providing a **reliable** experience at scale.
